Special Economic Zones (SEZs) in Rwanda are designed to address domestic private sector constraints such as; availability of industrial and commercial land, availability and the cost of energy, limited transport linkages, market access and availability of skills.

The Kigali SEZ (KSEZ) was designated and developed to accommodate different types of industries including; heavy and light manufacturing industries, large scale users industrial plants, industries requiring excellent national/international communication network, industries requiring close links with other firms (those firms which produce component parts for the same product or those involved in separate stages of the same industrial process), wholesalers, chemical, pharmacy and plastics, warehousing, tourism and service industry and telecommunications among other services.

Rwanda has strategic access to countries in the East and Central African region such as Kenya, Tanzania, Democratic Republic of Congo, Uganda and Burundi and is a catchment area of a consumer market of people reachable by road, barely four hours away from Kigali in all directions.

It is also a member of a number of global and regional organizations and treaties of interest to potential investors such as the COMESA (The Common Market for Eastern and Southern Africa), which alone gives Rwanda access to a market size of over 500 million people in the region.

FOREWORD

Clare Akamanzi
Chief Executive Officer
Rwanda Development Board
Therefore, to maximize the benefits from these markets in the region and around the world, the Rwandan Government established SEZs to enhance the country’s competitiveness as a commercial/logistics hub, taking advantage of her natural strategic location through the promotion of export oriented industrial activities as well as re-exports, manufacturing and services.

Today, over 100 companies are already set up in the KSEZ, manufacturing made in Rwanda products from raw materials sourced from Rwanda, most of which are exported after.

For example, we have Africa Improved Foods who make nutritious foods using soya, milk, maize among other products they buy from farmers, process it, and then export it. Last year, they exported goods worth an estimated US$ 30 million.

The infrastructure in the SEZs enables us to attract companies such as Africa Improved Foods, which make big contributions to Rwanda’s exports.

Therefore, industrial parks actually provide the infrastructure to make it faster for industries to take off and when they do, they allow a country like Rwanda to export processed products, which bring in more money in terms of their value compared to raw products.

In terms of creating jobs, Rwanda has been creating new jobs every year and targets to create over 1.5 million jobs over the next seven years.

To achieve this, industrialization is key. Almost 70% of Rwanda’s population is employed in agriculture, most of whom are youth and can easily be absorbed in basic manufacturing.

A very good example is in garment manufacturing where a company like Pink Mango, C&D Products Rwanda, also located in the KSEZ employs over 1,500 people. If we have 100 more businesses like Pink Mango, C&D Products Rwanda in the SEZs, it would have industrial parks as the primary source of jobs.

It is my hope therefore that after reading the companies in this KSEZ directory, you decide to invest in Rwanda or refer a friend. We are with you every step of the way.
Rwanda is a resilient, forward-looking country with a vision of becoming a globally competitive knowledge-based economy by 2024.

In the last 25 years, Rwanda has redefined itself as the preferred investment and tourism destination of the world.

Under H.E President Paul Kagame’s leadership, Rwanda has become a reference point for good governance in the region, political stability with well-functioning institutions, observance of the rule of law and zero tolerance for corruption.

Rwanda today prides itself in being among the easiest, safest and cleanest places to do business and travel to in the world.

- The economy has grown at an annual GDP average rate of 8% for the past decade.
  - GDP per capita grew to US$787 in 2018: from US$774 in 2017;
  - Our GDP per capita target is US$1,382 by 2024;
  - Currently, the services sector is the largest contributor to GDP. The sector contributes about 48%, followed by Agriculture at 29% and the Industrial sectors 16% respectively;
- Inflation has been kept at single digit since 2008;
- Rwanda has consistently been given high ratings by Fitch Ratings. In 2018, Fitch affirmed Rwanda’s B+ ratings reflecting Rwanda’s strong governance and doing business metrics, low public debt/GDP and high growth potential;
- Rwanda has also consistently emerged as the top global reformer in the annual World Bank Doing business reports.
- The 2019 World Bank Doing Business Report positioned the country to be the second easiest place to do business in Africa and 29th globally;
- Rwanda remains among the most competitive African countries thanks to efficient goods and labor markets and a stable political situation that supports robust GDP growth.

SPECIAL ECONOMIC ZONE

Special Economic Zone (SEZ) refers to a geographically specified and physically secured area administered by a single body, offering certain incentives including more liberal and simplified economic regulations for businesses to physically locate and operate within it.

SEZ Regulator

The Special Economic Zone regulator in Rwanda is based at the Rwanda Development Board (RDB).

SEZ Developer

Prime economic zones Ltd is the promoter, developer and operator of the Kigali special economic zone.

Prime Economic Zones Ltd has identified the demand for an efficient and viable special economic zone that will contribute significantly to Rwanda’s development goals while utilizing its own resources in an effective manner through:

- Job creation and skills transfer;
- Increasing foreign and domestic private sector investment;
- Export growth and diversification;
- Promotion of made in Rwanda program.

Prime Economic Zones Ltd has mobilized equity to tune of over 100 Million US dollars in development and operations of the Kigali special economic zone phase I and II.

Prime economic zones Ltd offers a number of benefits to clients including:

- A pro–business environment, transparent and predictable policies as well as international best practices are in place;
- The park provides world class infrastructure including roads, electricity supply, water supply, integrated central sewerage system, fiber optic connection, lorry parks, etc.
- Safety and Security.

KIGALI SPECIAL ECONOMIC ZONE

The Kigali Special Economic Zone (KSEZ) has been set up through the merger of former Kigali Free Trade Zone and the Kigali Industrial Park projects.

The Kigali SEZ is developed in two phases:

Phase I covers 98 hectares of land. It is serviced with roads, electricity, water and firefighting systems, sewage and fiber optic cables that will serve in easing the operations of investors. This phase hosts 97 plots divided as follows:

- One plot sheltering a control room where all the electricity of the zone converges and is controlled
- One plot sheltering water tanks supplying potable water to individual plots
- One plot sheltering a sewage treatment plant that will treat all the sewage water from industries
- 94 plots that accommodates industries/warehouses

Phase II has 178 hectares of land. It is serviced with roads, electricity, water and firefighting systems and sewage network.
The number of plots in that phase is 67 plots divided as follows:

- One plot sheltering a control room where all the electricity of the zone converges and is controlled
- One plot sheltering water tanks supplying potable water to individual plots
- One plot sheltering a sewage treatment plant that will treat all the sewage water from industries
- 64 plots that will accommodate industries/warehouses including one plot that will serve as an ICT PARK

**Acquiring land in Kigali SEZ**

Land in SEZ is acquired through the “developer” (private company) but under the regulation of the government in this case SEZAR.

The price per square meter is USD 50 and the minimum size of land that can be acquired is one hectare. After acquiring the land, you get all the relevant licenses and permits from RDB at SEZAR.

**Main potential economic benefits from zones**

- Increased tax revenue through expanded tax base hence reducing the budget deficit;
- Environment protection;
- Import substitution due to increase in manufacturing of products for local consumption;
- Reduced balance of payment deficit.

**Export Processing Zone user license**

According to the “East African Customs Act”, an Export Processing Zone (EPZ) is a customs area where one is allowed to import plant, machinery, equipment and material for the manufacture of export goods under security, without payment of duty.

The imported goods are subject to customs control at importation, through the manufacturing process, to the time of sale/export, or duty payment for home consumption.

Other benefits of operating such enterprises include; free trade conditions, streamlined Government red tape allowing for one stop registration and licensing and a facility of long term tax concession.

The tea in Rwanda is well known all over the world for its infusion and enhanced brightness. Rwanda Mountain Tea produces some of the finest teas in Rwanda by investing in tea processing facilities, expert monitoring and guidance in crop production.

Starting in 2006 onwards, Rwanda Mountain Tea Ltd became a leading indigenous private investor in tea factories and plantations, acquiring majority shares in a number of formerly government-owned estates, including; Nyabihu and Rubyaa (in Western and Northern region), Kitabi (in Southern region), and Gisakura and Mata (in South-western region).

In addition, as part of its expansion plan, Rwanda Mountain Tea Ltd has invested in setting up a tea factory at Rutsiro (Western region), specialized in producing organic black CTC, orthodox black and green tea. Another recent addition is Gatave Tea Company in Nyamasheke district that is scheduled to be commissioned before the end of the year.

Rwanda Mountain Tea Ltd investments in the tea sector targets improvement in tea production through better farming practices and acquisition and expansion of tea fields across the country. The cycle has been completed by upgrading and building modern tea factories; and establishing a blending and packaging tea plant to cater for needs of end-consumers of tea in Rwanda and progressively in the region and other parts of Africa. Rwanda Mountain Tea Ltd is recognized globally for producing some of the best black CTC tea in the world, and has won accolades at various tea cupping sessions worldwide.

Besides producing and trading tea, Rwanda Mountain Tea Ltd is a key private investor in renewable energy. It has to date put up 2 hydro power plants along Giciye River that supply 8 MW to the national grid. It is in the process of building another plant on the same river with a capacity of 7.2 MW.

In other related developments, Rwanda Mountain Tea Ltd has signed concession agreements with the Government of Rwanda on 2 existing micro-hydopower plants to generate an additional 4 MW.
The companies in-group blend in easily in the communities where they operate, contributing to building schools, health centers, feeder roads, and houses to the very poor. They also contribute to the national program of one cow per poor family by annually giving livestock to the needy families.

RMT offers more than 25,000 jobs to the rural communities in addition to buying green leaf from local out-growers, thereby providing all year round market for their produce.

The company blends well with the communities where it operates, contributing to the socio-economic development of such communities through; building schools, health centres, feeder roads, houses for the very poor and bringing potable water to residents.

Finally Rwanda Mountain Tea Ltd is a large taxpayer and reinvests its profits in the country, thus contributing to Rwanda’s economic development.

Rwanda Mountain Tea Ltd prides itself on consistently delivering high quality tea to the world markets. At the factory level, the tea manufactured is tasted every hour to ensure it has the required quality standards of brightness, flavor and aroma.

Routinely these teas are tasted by tea experts or introduced into competition with other teas in the world to ensure top quality is attained and maintained.

At Rwanda Mountain Tea Ltd not only is quality and consistency extolled, but also safety at each production level. Certifications to attest to compliance and standardization of best practices in the food sector are regularly renewed and audits conducted by international certifying bodies.
**Speranza** group limited started operations in 2012 with a mission “to attain the lead in production of affordable products with world class quality to satisfy the local, regional and international markets”.

We are located in the Kigali special economic zone. We are the leading liquor manufacturers in Rwanda with seven liquor brands on its portfolio which are Speranza waragi, supergin No.1, supergin ordinary, coffee rum, millennium hills whisky, blue hills vodka and golden sherry. We also make Speranza juices.

In addition we also do bakery products which include bread, cakes, cookies, biscuits and pizzas, these products are tested and meet the national standard and bear the national standard S-MARK on them. Speranza group limited products have gained the highest ground on the locals liquor market due their quality and it has distribution points throughout the major cities in the country.

The company sees the future through clear lenses with expansion of its product portfolios to market the image of East Africa in the world of liquor internationally. Future projects of the company will include but not limited to mineral water and carbonated soda. Speranza is building its capacity to improve market penetration locally and then regionally and its aiming higher to be East Africa’s ambassador brand to the world.
